

ARLINGTON PUBLIC LIBRARY TECH PLAN.

TECHNOLOGY ASSETS

The Arlington Public Library technology consists of computers, e readers and printer.

Internet

Arlington public library provides Internet access to all persons in the library. Internet access is provided by American Broadband and is part of the village network. Because of technical issues the library board has authorized an update to the router for the library. This will allow for additional connections and stronger signals.

Computers

The library currently has 1 Windows computer, one Chromebook, and two e-readers for the community use. The library staff currently has access to 1 computer. The board has authorized the purchase of an additional windows systems. Technical services are provided under the village technology contract.

Printer

The library has a multi-function device to print, fax, and scan this device in networked to the library wired and wireless network.

Social Media accounts

The Arlington Public Library is authorized by the board to maintain social media sites. These include Facebook, and other appropriate Social Medial accounts. Only the Library Director is authorized to add, maintain and delete items on the site.

The Library maintains a Facebook page “Arlington Public Library” The library Director uses this as the main communication tool to the community.

Arlington also has a webpage <https://libraries.ne.gov/Arlington>. The library also maintains a static site on the village website <http://www.arlingtonne.org/government/public-facilities/arlington-public-library>

The Board will review the status of the library technology each year.
